

MADE TO DRAIN manufactures products to contain water and eliminate leaks above and below commercial flooring applications. Our products redirect water and debris to improve safety and sanitation.

FLOOR TROUGHS (STANDARD & ANTI-SPLASH)

Made to drain!

- For use in areas where liquids are a problem (ex: in front of ice machines)
- Uniquely manufactured and pitched to keep water and liquids draining rather than pooling
- The non-slip grating system is used to provide a comfortable and safe working surface
- Unique grout locking holes around the flange perimeter to ensure a complete seal of the grout to the pan

CLOG-FREE FLOOR TROUGHS

High capacity to prevent clogging and flooding!

- For use in areas where liquids and debris are a problem (ex: tilting kettles, braising pans, dish room, etc.)
- Trough pan is designed and sloped to contain large volumes of water and debris
- Full-length strainer tray provides immense waste capacity and strains down to the size of a grain of rice virtually eliminating clogging and flooding
- Grating system provides a safe and comfortable working surface and eliminates the need for rubber mats

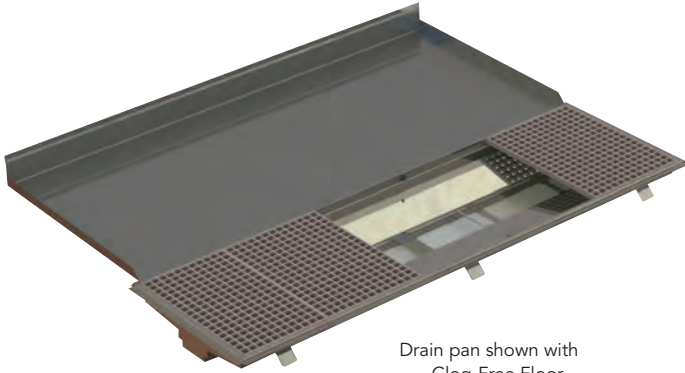

TROUGH LEAK ELIMINATOR

Eliminating leaks in above grade floor trough installations!

- For use in above grade floor trough installations
- Uniquely designed (patent pending) to solve the age old problem of floor trough leaks into occupied spaces below
- Seepage flange mates to the floor trough and clamps down on the waterproof membrane to create a watertight seal
- Weep holes in the seepage flange allow liquids to freely flow into the building drain line and will never accumulate and leak into the occupied spaces below
- Fits with all Made To Drain Troughs
- Easy to install
- Proactive solution for floor trough slab penetrations that may leak

(sold separately).

STAINLESS STEEL DRAIN PAN

Providing a lifetime floor surface!

- For use under equipment such as kettles, braising pans, steamers or ice machines
- Provides a seamless, watertight seal beneath equipment and protects from leaking into occupied spaces below
- Eliminates free standing water
- Replaces materials such as porous floor tile and grouted seams that become susceptible to leaks due to exposure to heat, moisture, food acids, expansion and contraction
- 1/4" per foot pitch allows drainage of water during equipment operation and cleaning

CORRECTIONAL HARDWARE PACKAGES

Providing safety and durability for the toughest environments!

- For use in all types of correctional facilities
- Heavy-duty, non-slip fiberglass grating system is designed for comfort and safety
- Tamper-resistant screws secure grating system
- Extreme-duty strainer trays or strainer baskets included
- Correctional package can be used with any Made To Drain troughs
